The Advocate Model

Leveraging Quality and Translational Sciences for SGM Population Health

Advocate Center Teams

Measure:

- **Electronic Medical Records (EMR) Team:** Identify SGM Populations and Phenotype Health Outcomes.

Process Improvement:

- **SGM Intervention Team:** Develop and pilot health system interventions to promote intersectional SGM equity.

System Work:

- **SGM Learning Health System Team:** Partner with health systems to implement and monitor health equity interventions at scale.

Population Health:

- **SGM Policy Team:** Partner with multisectoral coalitions to advocate for policy change advancing structural health equity.

Health System Quality Department Domains

Measure:

- Analytics and Measurement

Process Improvement:

- Pilots and Proof of Concept

System Work:

- Sustained Operations and Clinical Implications

Population Health:

- Population-wide Improved Health
